

# An Example Contribution for EuroCG'10

Sylvia Example\*

Anton Veryknown†

## Abstract

Here you should add a concise and exiting abstract for your paper.

## 1 Introduction

Well, the usual ... and also some citations, see [1] ... Large parts of this document are stolen (with permission) from [2].

**Conjecture 1** *Could it really be like this?*

**Observation 1** *Probably not ...*

**Definition 1** *Some things are just not definable ...*

**Theorem 1** *This is the most important theorem.*

**Proof.** It even comes with a proof ... □

**Lemma 2** *And then we also found this lemma ...*

There should be some more text explaining research results in some additional sections, but since this is only an example file ... on the other hand ... well, no!

## 2 Conclusion

What we did is amazing and improves everything that was there before.

## Acknowledgments

We thank the organizers for the tasty cookies ...
